PROFESSIONAL SUMMARY

Software Engineering student (4th Semester) at the University of the Punjab (CGPA: 3.64) with skills in Python, SQL, Linux, AWS, Data Analytics, and DevOps automation. Experienced in Python scripting, system monitoring, SSH automation, and data visualization using Matplotlib and Seaborn. Familiar with automation and DevOps tools including os, subprocess, requests, paramiko, psutil, and logging. Strong problem-solving, analytical, and software development skills with hands-on project experience.

EDUCATION

2024 - Present

BS Software Engineering

University of the Punjab

Current Semester: 4

(Quaid-e-Azam Campus,
Lahore)

CGPA: 3.64

2022 - 2024

Intermediate (ICS – Statistics)

Punjab College

Marks: 1078 / 1200

Phool Nagar

PROJECTS

Production Server Outage Investigation & Diagnostics Tool

- Built an automated Linux-based troubleshooting system for diagnosing server failures
- Performed service monitoring, network checks, and log analysis
- Identified root causes such as crashes, connectivity issues, and firewall blocks

Sales Data Analysis & Insight Generation (Python + SQL)

- Analyzed real-world sales dataset using Python (Pandas, NumPy) and SQL queries
- Performed data cleaning, handling missing values, and transformation
- Used SQL for aggregations, filtering, and extracting meaningful patterns
- Identified key insights such as top-performing products, revenue trends, and customer behavior
- Demonstrated strong data analysis, querying, and insight generation skills

Dockerized Flask Application

- Containerized a Flask web application using Docker and created custom Dockerfiles for deployment
- Configured MySQL database connectivity within a containerized Linux environment
- Gained hands-on experience in Docker image creation, container management, and application deployment

TECHNICAL SKILLS

- Programming:** Python, C++

- **DevOps & Cloud:** Linux, AWS Fundamentals, Bash Scripting, Docker, Python Automation
- **Data Analytics:** SQL, Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA
- **Tools:** Git, GitHub, VS Code, MS Office
- **Automation & Scripting:** os, subprocess, shutil, pathlib, requests, paramiko, logging, psutil

PROBLEM SOLVING

- Solved 90+ problems on LeetCode
- Strong understanding of:
 - Data Structures (Arrays, Linked Lists, Stacks, Queues)
 - Algorithms (Sorting, Recursion, Basic Dynamic Programming)
- Skilled in optimization, logic building, and complexity analysis

LANGUAGES

- English — Intermediate
- Urdu — Native
